

PROJECT OVERVIEW

The Dodson Creek Solar Project is a 117 megawatt (MW) solar development located in Highland County, Ohio. Dodson Creek will span approximately 1,462 acres and will be connected to a new switching station on the AC2-059 transmission line. The project is anticipated to positively impact the environment by using a variety of sustainable development practices, as well as the local economy by producing tax revenue, jobs, and contributions through an education fund. Dodson Creek is estimated to offset approximately 158,500 metric tons of carbon dioxide emissions annually during operations - the equivalent of taking an estimated 33,000 cars off the road every year.

PROJECT DETAILS

Dodson Creek Solar will provide energy and capacity for the transmission network and is expected to connect to the electric grid at the AC2-059 transmission line. Dodson Creek will provide a cost effective alternative to fossil fuels. Dodson Creek's project footprint will consist of approximately 1,462 acres signed under agreement and has ideal conditions for solar energy generation.

PROJECT SPECIFICATIONS

Operational Capacity: 117 MW

Location: Highland County, OH

Tax Revenue Generated Annually: ~\$1,053,000*

Estimated Onsite Construction Jobs: ~197*

Estimated Onsite O&M Jobs: ~3*

Targeted COD: Q4 2023

Carbon Dioxide Emissions Offset: ~158,500 metric tons annually*

*Calculations based on the National Renewable Energy Laboratory (NREL) JEDI Model, EPA Greenhouse Gas Equivalencies calculator and current Ohio tax for solar facilities. Benefits and impacts are estimated and not guaranteed. Subject to change.

ABOUT NATIONAL GRID RENEWABLES

National Grid Renewables, which includes the renewable energy development company formerly known as Geronimo Energy, is a leading North American renewable energy company based in Minneapolis, Minnesota, with satellite offices located throughout multiple states in the regions where it develops, constructs, and operates. As a farmer-friendly and community focused company, National Grid Renewables develops projects for corporations and utilities that seek to repower America's electricity grid by reigniting local economies and reinvesting in a sustainable future. National Grid Renewables is part of the competitive, unregulated Ventures division of National Grid and has a robust portfolio of solar, wind, and energy storage projects located throughout the United States in various stages of development, construction and operation.
